

兔抗 CENPC 多克隆抗体

中文名称：兔抗 CENPC 多克隆抗体

英文名称：Anti-CENPC rabbit polyclonal antibody

别名：MIF2; hcp-4; CENP-C; CENPC1

相关类别：一抗

储存：冷冻（-20℃）

抗原：CENPC

宿主：Rabbit

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	Centromere protein C 1 is a centromere autoantigen and a component of the inner kinetochore plate. The protein is required for maintaining proper kinetochore size and a timely transition to anaphase. A putative pseudogene exists on chromosome 12. Component of the CENP A-NAC (nucleosome-associated) complex, a complex that plays a central role in assembly of kinetochore proteins, mitotic progression and chromosome segregation. The CENP A-NAC complex recruits the CENP A-CAD (nucleosome distal) complex and may be involved in incorporation of newly synthesized CENP A into centromeres.
--------------------	--

Applications:	ELISA, IHC
Name of antibody:	CENPC
Immunogen:	Fusion protein of human CENPC
Full name:	centromere protein C
Synonyms :	MIF2; hcp-4; CENP-C; CENPC1
SwissProt:	Q03188
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human prostate cancer and Human esophagus cancer
IHC Recommend dilution:	50-200
