

FITC 标记的亲合素

中文名称： FITC 标记的亲合素

英文名称： FITC-conjugated Avidin

相关类别： 抗原

储 存： 冷冻（-20℃） 避光

标 记 物： FITC

技术规格

Background	Avidin is chromatography purified from egg white. The extinction coefficient, E(1%) at 280nm is 15.5. The product is in 10 mM phosphate-buffered saline, Ph 7.4, containing 1% bovine serum albumin, 0.05% sodium azide and 50% glycerol. Avidin(from egg white) is conjugated with FITC. The conjugate is purified by molecular sieving and is completely free of unbound FITC. FITC-Avidin can be used for the detection or localization of biotinylated biomolecules.
Applications	1/200-1000 for ELISA 1/20-200 for Immunohistochemistry/cytochemistry 1/20-200 for Immunofluorescence
