

HRP 标记山羊抗人 IgM

- 中文名称: HRP 标记山羊抗人 IgM
- 英文名称: HRP-conjugated Goat anti-human IgM
- 相关类别: HRP 标记二抗
- 储 存: 冷冻 (-20℃)
- 标 记 物: HRP

技术规格

Background	IgM normally constitutes about 10% of serum immunoglobulins. IgM antibody is prominent in early immune responses to most antigens and is largely confined to plasma due to its large size. Monomeric I gM is expressed as a membrane bound antibody on the surface of B cells and as a pentamer when secreted by plasma cells. Due to it s high valency IgM is more efficient than other isotypes is binding antigens with repeating epitopes (virus particles and red blood cells) and is more efficient than IgG in activiating the complement pathwa y. The gene for the mu constant region contains four domains sepa rated by short intervening sequences.
Applications	1/50-200 for most application
